

AABAN REHMAN

ASP.NET Core Developer | Full-Stack | Microsoft Certified | Azure | DDD | VSA

+92 347 0506699 • aabanqureshi564@gmail.com • [LinkedIn](#) • Islamabad

Summary

Passionate and detail-oriented **ASP.NET Core Developer** with hands-on **full-stack** experience building modern web apps using **ASP.NET Core**, **Blazor**, **Entity Framework Core**, and **SQL Server**.

I've earned multiple **Microsoft certifications**, including **C# Fundamentals**, **Azure Fundamentals (AZ-900)**, **Azure AI Fundamentals (AI-900)**, and the **Back-End Development with .NET** specialization, showing my relentless drive to master clean, scalable, and future-proof practices.

I've delivered real-world impact: enterprise-grade **legal-tech solutions** at **Kartoa Technologies (WooqLaw.com)** and high-scale applications at **OwaSoft Technologies**, where I owned **microservices**, **integrations**, and production systems. My focus? Writing **clean, maintainable code**, designing rock-solid architectures, and exploring **.NET + AI/cloud** synergies to ship truly impactful software.

Experience

Kartoa Technologies

Net Developer

02/2025 - 05/2025

Legal-tech solution provider

- Gained hands-on full-stack development experience by working on real client projects using Blazor for frontend and ASP.NET Core for backend services
- Contributed to building modules for a legal-tech platform ([WooqLaw.com](#)), where I implemented features specific to lawyers' workflows and case management
- Collaborated closely with senior developers to understand and apply enterprise architecture patterns, improving code structure and maintainability
- Developed and optimized 5+ reusable components in **Blazor**, enhancing frontend efficiency.
- Implemented API endpoints increasing data retrieval speed by 22% with ASP.NET Core.

Adan IT Center

Project Lead

08/2024 - 02/2025

IT institute of technology

- Led production readiness and go-live for the **Learning Management System (LMS)** in partnership with **NAV TTC (National Vocational & Technical Training Commission)**, ensuring platform stability with real data migration and population for nationwide vocational training use.
- Collaborated directly with trainers, teachers, and institutes under **NAV TTC** to conduct system training sessions, demonstrate features, gather feedback, and drive user adoption across multiple **government-affiliated** locations.
- Attended and contributed to requirement refinement meetings with stakeholders, clarifying needs, prioritizing enhancements, and aligning final configurations with educational workflows and compliance standards.
- Oversaw final testing, deployment, and post-launch support, delivering a reliable, production-grade platform that supported government-backed skills development programs effectively.
- Applied production best practices to ensure scalability, data integrity, and maintainability in a live environment serving multi-institute users.

Experience

OwaSoft Technologies

Full Stack .Net + React(TS) Engineer

07/2025 - Present

Provider of scalable applications

- Developed and maintained scalable applications using ASP.NET Core MVC, micro-architecture patterns, and modern development practices
- Collaborated seamlessly with the frontend team, leveraging my full-stack expertise to ensure smooth integration between backend and UI components
- Led and mentored interns, providing technical guidance, code reviews, and training to help them grow as developers
- Designed and managed server-side architecture and database pipelines, ensuring reliability, scalability, and efficiency
- Oversaw production server maintenance, including deployments, monitoring, and performance optimization to keep systems stable and secure
- Served as project lead on two out of three key initiatives (**InkedFlow** and **MediDiscounts**), coordinating cross-team efforts: communicated with mobile teams on API designs for seamless app integrations, web teams for user portal APIs, and built MVC-based admin panels for analytics and dashboards, ensuring cohesive architecture and on-time delivery.
- Architected and implemented a **microservices-based** system for **InkedFlow** using ASP.NET Core MVC, comprising over 10+ .NET Core API projects and leveraging **Domain-Driven Design (DDD)** and **Vertical Slice Architecture (VSA)** to boost scalability, fault isolation, and maintainability.
- Integrated third-party services including **PostGrid** for automated mailing of discount cards and correspondence, **USPS** for real-time address verification for **U.S. users**, and **Stripe** for secure payment gateways, handling transactions efficiently and reducing integration errors by 30%.
- Developed background services in ASP.NET Core for automated contract generation, invoice creation, and push notifications via **Firebase** for mobile apps, optimizing workflows and improving user engagement in real-time scenarios.
- Managed full lifecycle of server infrastructure on **AWS Virtual Machines**, including deployments, **CI/CD pipelines**, monitoring, and performance tuning to maintain 99.9% uptime and secure production environments.
- Oversaw database administration with **MSSQL** and **EF Core**, executing production migrations, schema updates, and optimizations, ensuring data integrity and efficiency for high-traffic applications.
- Collaborated with frontend teams using full-stack expertise (**Blazor**, **React**) to integrate backend APIs smoothly, while mentoring interns through code reviews and technical guidance to foster team growth.

Education

International Islamic University

BS Software Engineering

Islamabad

01/2022 - 06/2026

Key Achievements

Integration of Modern Development Practices

Successfully integrated modern development practices and clean architecture in multiple projects, increasing maintainability and scalability

Third-Party Service Integrations

Integrated PostGrid for mailing, USPS for address verification, and Stripe for payments across projects, handling thousands of transactions with zero downtime and slashing errors by 30%.

Cross-Team Project Coordination

Directed teams on InkedFlow and MediDiscounts as lead, integrating mobile APIs (Firebase), web portals, and MVC admin dashboards cutting integration bugs by 25% and ensuring on-time delivery.

Automated Workflow Implementation

Built ASP.NET Core background services for contract generation, invoicing, and Firebase notifications in MediDiscounts—streamlining ops and halving user engagement response times.

Cloud Infrastructure Management

Managed AWS VM deployments, CI/CD, and monitoring.

Database Optimization Expertise

Administered MSSQL/EF Core with migrations and schema updates for enterprise apps like WooqLaw.com, enhancing data integrity and cutting query latencies by 35%.

Key Achievements

Mentored and onboarded interns

across OwaSoft, delivered code reviews, technical guidance, and hands-on training, accelerating team ramp-up and improving overall code quality and maintainability.

Earned Microsoft Back-End Engineer Specialization

and Azure certs (AZ-900/AI-900), applied cloud fundamentals to real projects, bridging on-prem and cloud practices for more resilient, scalable solutions.

Managed AWS infrastructure

for deployments and monitoring in OwaSoft apps, set up CI/CD pipelines and performance tuning, achieving consistent uptime and quick rollback capabilities in production.

Certifications

[Microsoft Back-End Engineer Specialization](#) — [Credential URL](#)

[Microsoft Azure Fundamentals \(AZ-900\)](#) — [Credential URL](#)

[Microsoft Azure AI Fundamentals \(AI-900\)](#) — [Credential URL](#)

Skills

Backend & .NET Core:

C# · ASP.NET Core · Entity Framework Core · Domain-Driven Design · Vertical Slice Architecture · SOLID Principles · Clean Architecture · Microservices · Background Services · MVC · Minimal APIs · Web APIs

Frontend: Blazor · React · HTML5 · CSS3 · Bootstrap · JavaScript · jQuery · TypeScript

Databases & Data: MSSQL Server · MySQL · SQL · Database Management

Cloud, DevOps & Infrastructure:

Azure Fundamentals AZ-900 · Azure AI-900 · AWS Virtual Machines · AWS Deployments · CI/CD Pipelines Deployment · Server Management · Git

Other Tools & Practices:

RESTful APIs · Third-Party Integrations · Stripe · PostGrid · USPS · Firebase · Performance Optimization
